Letters to the Editor

- CCD photometry of AC 211/X 2127+119: The 8.5 h period of the X-ray binary in the M 15 globular cluster
Ilovaisky, S.A., Aurière, M., Chevalier, C., Koch-Miramond, L., Cordoni, J.P., Angebault, L.P.

L1

Cosmology

- De Sitter-type of cosmological model in a five-dimensional theory of gravity with variable rest mass
Chatterjee, S.

1

- Cosmological constraints of the "inos" composing galactic halos
Ruffini, R., Song, D.J.

3

- Polarization of the cosmic background radiation in magnetic Bianchi type-II cosmologies
Fabbri, R., Tamburrano, M.

11

- Primordial nucleosynthesis in the Brans-Dicke theory with a variable cosmological term
Arai, K., Hashimoto, M., Fukui, T.

17

Extragalactic astronomy

- Halo parameters of spiral galaxies
Athanassoula, E., Bosma, A., Papaioannou, S.

23

- VLA high resolution observations of weak Leiden-Berkeley Deep-Survey (LBDS) sources
Oort, M.J.A., Katgert, P., Steeman, F.W.M., Windhorst, R.A.

41

- Line and continuum radiation from the outer region of accretion discs in active galactic nuclei. I. Preliminary considerations
Collin-Souffrin, S.

60

- Apparent number density enhancement of quasars near foreground galaxies due to gravitational lensing. I. Amplification cross sections
Schneider, P.

71

- Apparent number density enhancement of quasars near foreground galaxies due to gravitational lensing. II. The amplification probability distribution and results
Schneider, P.

80

- Stabilization and consequences of relativistic electron bumps in extragalactic radio sources
Lesch, H., Schlickeiser, R.

93

- The detailed velocity field of the ionized gas in the interacting pair of galaxies NGC 7752-53
Marcelin, M., Lecoarer, E., Boulesteix, J., Georgelin, Y., Monnet, G.

101

- Radial velocities of galaxies in the cluster Klemola 22 from observations with OPTOPUS, the ESO multiple object spectroscopy facility
Cristiani, S., de Souza, R., D'Odorico, S., Lund, G., Quintana, H.

108

Galactic structure and dynamics

- The planar age-velocity dispersion relation from a polar sample of F stars with solar composition
Knude, J., Schnedler Nielsen, H., Winther, M.

115

Formation, structure and evolution of stars

- Mean free paths of non-degenerate neutrinos in neutron star matter
Haensel, P., Jerzak, A.J.

127

- Interstellar extinction and polarimetric properties of the star HD 200775
Pfau, W., Pirola, V., Reimann, H.-G.

134

- Absolute parameters of the early-type double-lined eclipsing binary AL Sculptoris (HD 224113)
Haefner, R., Skillen, I., de Groot, M.

141

- The nature of the exciting star of RCW 34
Vittone, A.A., de Martino, D., Giovannelli, F., Rossi, C.

157

- Reasons why nova FH Serpentis 1970 probably had a total luminosity above the Eddington limit during its outburst
Friedjung, M.

164

- The effect of a poloidal magnetic field on the stability of a rotating self-gravitating disc
Schmitz, F.

167

- Serpens - SVS 20: a new young infrared double source
Eiroa, C., Lenzen, R., Leinert, C., Hodapp, K.-W.

171

- (RN) A sufficient condition for stability of a rotating body
Hanawa, T.

383

Stellar atmospheres

- Abundances of light elements in halo dwarfs: a re-analysis
Magain, P.

176

The metal abundance of metal-rich globular clusters. III. NGC 288, NGC 362, NGC 5897, NGC 6352 and NGC 6362

Gratton, R.G. 181

A comparison of coronal X-ray emission observed with the Einstein and EXOSAT observatories

Schmitt, J.H.M.M., Pallavicini, R., Monsignori-Fossi, B.C., Harnden, F.R., Jr. 193

Diffuse matter in space (including HII regions and planetary nebulae)

Kinematical origin of the dark clouds in Taurus and of some nearby galactic clusters

Olano, C.A., Pöppel, W.G.L. 202

Collisions of high-velocity clouds with the Milky Way: the formation and evolution of large-scale structures

Tenorio-Tagle, G., Franco, J., Bodenheimer, P., Różyczka, M. 219

The molecular counterparts of the submillimeter compact sources in L 1551 and B 335

Walmsley, C.M., Menten, K.M. 231

Millimetre and submillimetre molecular line observations of the southwest lobe of L 1551: evidence of a shell structure

Rainey, R., White, G.J., Richardson, K.J., Griffin, M.J., Cronin, N.J., Monteiro, T.S., Hilton, J. 237

The fractal dimension of star-forming sites in galaxies

Feitzinger, J.V., Galinski, T. 249

Dark clouds in front of globular clusters

Sandell, G., Stevens, M.A., Heiles, C. 255

A survey of formaldehyde in high galactic latitudes

Heithausen, A., Mebold, U., de Vries, H.W. 263

The Sun

An analytical study of shock waves in thin magnetic flux tubes

Ferriz-Mas, A., Moreno-Insertis, F. 268

The interstellar cosmic ray spectrum and energy density. Interplanetary cosmic ray gradients and a new estimate of the boundary of the heliosphere

Webber, W.R. 277

The thermal stability of coronal loops by nonlinear diffusion asymptotics

Pakkert, J.W., Martens, P.C.H., Verhulst, F. 285

The solar system

Orbital evolution of asteroids near the secular resonance v_6

Froeschlé, Ch., Scholl, H. 294

Celestial mechanics and astrometry

Chaos and secular variations of planar orbits in 2:1 resonance with Dione

Ferraz-Mello, S., Dvorak, R. 304

The mass of the asteroid (10) Hygiea derived from observations of (829) Academia

Scholl, H., Schmadel, L.D., Röser, S. 311

Meridian observations of Uranus and Neptune at Bordeaux Observatory. Comparison with ephemerides

Rapaport, M., Requième, Y., Mazurier, J.M., Francou, G. 317

Optical and radio astrometry of four late-type stars with maser emission

de Vegt, C., Kleine, T., Johnston, K.J., Bowers, P.F., Spencer, J.H. 322

Physical and chemical processes

Resonance scattering of Lyman- α in the presence of an electrostatic field

Favati, B., Landi Degl'Innocenti, E., Landolfi, M. 329

Radiative atomic data for neutral magnesium. I. Oscillator strengths

Mendoza, C., Zeippen, C.J. 339

Radiative atomic data for neutral magnesium. II. Photo-ionization cross sections

Mendoza, C., Zeippen, C.J. 346

The method of projected characteristics for the evolution of magnetic arches

Nakagawa, Y., Hu, Y.Q., Wu, S.T. 354

Acoustic waves in early-type stars. II. The modified equations and the numerical code

Wolf, B.E. 371
